EDUCATION

Kulachi Hansraj Model School, Delhi – 12th

2018

Bharati Vidyapeeth College of Engineering, Delhi – B.Tech

AUG 2018 – PRESENT

TRAINING AND COURSES

Machine Learning with Tensorflow on GCP – Coursera

JAN 2019 – <https://coursera.org/share/8e469ee4adbddb7c2aa31fb6dd42d1af>

Data Science Master Class – Coding Blocks

MAY 2020 – <https://online.codingblocks.com/app/certificates/CBOL-112486-770e>

AWS Specialization – Coursera

JUNE 2020 – <https://coursera.org/share/58ba438c03566b18c01b9e293df7acdb>

PROJECTS

Covid Vaccine Notifier – github.com/ShauryaAg/VaccineNotifierAPI

- This project, along with the frontend, allows users to signup for notification regarding availability of Covid-19 Vaccine in their region
- It checks for the availability of vaccines every 1.5 hours and sends an email if a vaccine slot is available.

Anon – <https://github.com/ShauryaAg/Anon-Reporter>

- Anon is an online reporting platform that ensures the anonymity and legitimacy of the report.
- Any user can report an incident against them and we ensure the reports are as legit as possible through clever use of blockchain and ERC-20 Token transfers, whilst ensuring the anonymity of the reporter.

Webathon-Backend – github.com/ShauryaAg/Webathon-Backend

- Developed an API for organizing online hackathons/events using Django.

Secure-Chat-App – <https://github.com/ShauryaAg/Secure-Chat-App>

- A small chatting API that only sends the message to the person who is tagged in the message

MemeTags – github.com/ShauryaAg/MemeTags

- This project was meant to help people easily tag and hence, find the pictures stored in their phone
