PROJECTS

MemeTags — *github.com/ShauryaAg/MemeTags*
- This project was meant to help people easily tag and hence, find the pictures stored in their phone

SoHealth — *github.com/ShauryaAg/SoHealth*
- A project meant to motivate people to work out more by rewarding them every time they work out.

Webathon-Backend — *github.com/ShauryaAg/dsc-webathon*
- Developed the backend for DSC, BVP Webathon event using django.

Image_Watermark — *github.com/ShauryaAg/overlay-image*
- A small project to add watermark to a bunch of images stored in a directory at once.

SpotHole — *https://github.com/mayan-sharma/SIH*
- This project was made by us to detect and report potholes on the road to the concerned authorities
- In this project, I worked on the ML model to detect the potholes and the flutter app used by us.

Secure-Chat-App— *https://github.com/ShauryaAg/Secure-Chat-App*
- A small chatting API that only sends the message to the person who is tagged in the message
